

Nallapaneni Sai Teja

Front End developer

nallapanenisajteja@gmail.com | +91 9121048098 | [LinkedIn](#) | [GitHub](#)

Skills

Frontend Development:HTML, CSS, JavaScript

Backend Development:Django

Tools & Platforms:Git,Unix,MS-office

Experience

Industrial training

Lineysa and Thevan software technologies | Vijayawada

08/2022 - 01/2023

- Developed a full-stack events management platform using Django, enabling secure user and admin authentication.
- Designed a backend framework to efficiently store and manage images in the database.
- Implemented admin functionalities for event creation, image uploads, and CRUD operations.

Projects

E-commerce - Online Store | [Link](#)

Django | Python | Pillow | PostgreSQL/MySQL

- Developed a dynamic events management platform with user and admin authentication and secure login functionality.
- Designed an admin dashboard for event management, enabling CRUD operations and image uploads using Pillow.
- Implemented Django ORM for efficient database management, ensuring scalability and security.

Dataverse - Datasets hub | [Link](#)

HTML | CSS | JavaScript | bootstrap

- Built a web-based tool for seamless dataset integration in machine learning and deep learning models.
- Enabled file and URL-based dataset uploads with access to sklearn module datasets for standardized usage.
- Integrated an AI chatbot using API keys to assist users with real-time dataset queries and insights.
- Streamlined developer workflow for rapid ML/DL model experimentation and deployment

Education

ANU collage of engineering and technology | Guntur

2024 - 2027

Bachelors in AIML

St Mary's group of institutions | Guntur

2020 - 2023

Diploma Web Designing

Percentage: 91.48%
